Audio quality is not that good	.
Awsm	.
Connectivity issues	.
DADH class would be more interesting mam if you take lecture.	.
For sometime it is connected very good and i could make notes but after few minutes it gets disconnected and I have to fill the id and password again so the notes that are made gets totally confusing.	.
Good going	.
I think recorded lectures would be more beneficial. Or more like recorded lectures + live interactive chat heads for individuals doubts and queries would help more than the ongoing lectures

Theory and practical exams should be conducted more often	1
things can be definitely improved like toilets drinking water cafeteria for students n staff..	1

PEOPLE'S COLLEGE OF DENTAL SCIENCES & RESEARCH CENTRE, BHOPAL

STUDENTS FEEDBACK ON ONLINE TEACHING VIA ZOOM APP

Students feedback was taken randomly from 121 students from BDS 1st to IV year via online feedback system .Feedback was regarding the online classes that are being conducted via ZOOM App.

According to 88% students, the class started on scheduled time.

64% students find it easy to navigate through the online class.

47% students say that audio quality was fair, and 36% of them said that audio quality was good.

42 % students feel that video quality was good

32% students say that lectures were clear and easy to understand.

28% say that lectures were interactive.

According to 50% students, appropriate teaching audio-visual aids were used effectively by teachers.

Overall teaching experience was rated good by 42% students.

COMMENTS/SUGGESTION BY STUDENTS:-

- While online learning connectivity does not establish between host and learner through this asap sometimes it takes more than enough time to connect the meeting .
- Teachers should practice with the app before using it so that they understand how it functions and that there are no hindrance's during the lectures.
- I think recorded lectures would be more beneficial. Or more like recorded lectures + live interactive chat heads for individuals doubts and queries would help more than the ongoing lectures held via zoom. This will also maintain privacy of the users and reduce network connectivity issues. I would very much appreciate if regular class tests, assignments etc are given through google classroom. Also, please clear our doubts regarding the upcoming sessionals and the following exam schedule that will be held.
- Thank you so much

- Some students are playing music between lectures it's very difficult to understand
- Zoom is not at all a safe app. All our private information is shared by Hackers on dark web. We must stop using it & switch to another alternatives like Cisco WebEx.
- Sometime we face some technical problem but this is better way in this time but not best.
- This online teaching is not worthful. This is just wastage of time as well as internet. Try to improvise it as many of the teacher are unable to use it properly which creating chaos and just complete the chapter in one day which dint happened yet in original class.
- Audio quality is not that good
- It always shows " wait to let in by host" or some kind of "error-5" which somehow interrupts and disconnect the meeting after which it doesn't reconnect easily... please check this
- Kindly extend the number of classes per day from two to three. Anatomy classes are not taking place from a long time. Thankyou.
- There is sometimes network problem and the audio is not to much clear
- Teacher should share their screen
- It could be more interactive and better at technical. Doubts should be given extra time. And also extra classes for difficult topics should be given.
- Proper lighting and stable internet connection should be considered.
- Must find another way to teach
- Interactive, learning and useful sessions...
- It's going good & v easy & comfortable learning way . A good experience of learning with well-experienced & knowledgeable professors.
- Not all faculty were able to use the zoom classroom efficiently... Sometimes there is a serious voice lag from there side or no sound at all and it's not just for one computer but the entire class.. Also some students purposely blast off loud music to interrupt the flow of the class as they get bored but when they stop not every device can overcome the disturbance and may have to reconnect.. Also some faculty (subjects other than da/dh and dm) do not use the screen sharing feature Instead they just dictate or show their ppts on the laptop via mobile and since naturally there hand keeps shaking it is quite unclear to read.. It is a great initiative keeping the current situation in mind and just needs a little refining from both our as well as faculty members.
- Our general surgery and general medicine lectures are not been taken kindly look into this matter
- DADH class would be more interesting mam if you take lecture.
- For sometime it is connected very good and i could make notes but after few minutes it gets disconnected and I have to fill the id and password again so the notes that are made gets totally confusing.
- Connectivity issues
- Good going
