Pros and Cons of Online education delivery during and after Pandemic.

With the advent of internet and computers online education has become very popular. It is a very convenient and easy way of learning. In online education students access online study material, join virtual lectures, post questions to teachers, chat with fellow students, give virtual exams. However online education has both advantages and disadvantages.

Advantages

- (i) Comfort & Convenience: students can attend online lecture from the comfort of their home. They can study at their convenience.
- (ii) Documentation: All the study documents, teaching materials, e-mails etc. are safely stored in online database. If students need any of these, they can access it fast. Saving lots of time.
- (iii) No travelling: travelling time and cost is saved in online education. A lot of fuel is saved too.

Disadvantages

- (i) Non-spoken interaction is missing in online education, there is no face to face conversation between students and teachers. Students can't meet other fellow students. This puts barriers in communications skills and personality development.

Topic: Pros & cons of Online Education delivery during & after pandemic.

Introduction:
Online education is a form of education which is delivered & administered using internet. Online education can be divided into several categories depending on the amount of online learning that is incorporated into the course, ranging from traditional face to face learning to blended learning to exclusive online course.

As several countries began to implement lockdown measures, with the lockdowns resulting in closure of schools & colleges. Students & teachers alike have turned to ed-tech platforms to help maintain academic momentum.

Online learning in Indian market has gained tremendous traction in recent years. Aside from just academic content, they also enable students to gain skills.

But there are two sides to every story. E-learning too has its fair share of pros & cons.

Pros & Cons of Online Education delivery during and after Pandemic

Pros and Cons of online education is a hotly debated topic that divides opinion. 2020 has caused us a lot of fatal situations. Everything has gone through a complete change now-a-days; so is the student life. As social distancing, staying safe at home became mandatory, this only alternative for giving and taking knowledge became through online teaching.

First and foremost we all knew that this pandemic would be lasting long. Online teaching was the only option to keep the students back to studies as they would have lost track. Teachers are now walking right into the homes of their students before pandemic. Kids were prohibited from having and using mobiles and computers.
