**DEPARTMENT OF ADVANCED SKILL LAB**

**INTRODUCTION**

Medical-surgical nursing is a specialized field within nursing that focuses on the care of adult patients with medical and surgical conditions. It is a dynamic and challenging area of nursing that requires a broad knowledge base, critical thinking skills, and the ability to provide holistic care to individuals facing a wide range of health challenges. Department of Medical Surgical Nursing lab was established in 2006 with the intake of 100 Students from B.Sc Nursing

## PEOPLE'S COLLEGE OF NURSING AND RESEARCH CENTRE

### VISION

We envision the advance skill nursing lab as a dynamic and innovative center of excellence within our university, dedicated to shaping the next generation of highly skilled and compassionate healthcare professionals. Our vision is rooted in the principles of transformative education, cutting-edge simulation, and a commitment to the highest standards of patient-centered care

### MISSION

The mission of advance skill nursing lab is to provide a structured and supportive learning environment where nursing students can integrate theoretical knowledge with hands-on clinical skills. The lab aims to prepare students for the challenges and complexities of medical-surgical nursing by focusing on several key components like Clinical competence, Skill Mastery, Patient Centered care ,continuous learning and reflection.

### LAB OBJECTIVE

#### 1. ClinicalSkills Development:

- Developandenhancebasicclinicalnursingskills,suchaspatientassessment,vitalsign measurement, and physical examination techniques.
- Practiceandimproveproficiencyinvariousnursingproceduresandtechniquescommonlyused in medical-surgical settings.

#### 2. CriticalThinkingandDecisionMaking:

- Fostercriticalthinkingskillsbyengagingstudentsinrealisticpatientcare scenarios.
- Encouragestudentstomakeclinicaljudgments,prioritizecare,andimplementappropriate nursing interventions.

### **3. Patient Safety and Infection Control:**

- Emphasize the importance of patient safety and infection control measures.
- Instruct students on proper techniques for maintaining a sterile environment and preventing healthcare-associated infections

### **4. Medication Administration**

- Train students in safe and accurate medication administration.
- Provide opportunities for students to practice dosage calculations and understand medication interactions.

### **5. Technology Integration**

- Familiarize students with the use of technology in nursing practice, such as electronic health records, medical devices, and other healthcare technologies.

### **6. Professionalism and Reflective Practice:**

- Foster a sense of professionalism in nursing practice.
- Encourage self-reflection and continuous improvement by providing opportunities for students to review and analyze their own performance.
